CAREER OBJECTIVE

I am a final-year B.Tech student in Artificial Intelligence and Machine Learning. I'm eager to use my skills in data analysis, programming, and problem-solving to work on real-world projects. I want to learn new technologies, gain practical experience, and build a strong career in data and AI-related fields.

EDUCATION

DR YSR ANU College of Engineering And Technology

2022 - 2026

Bachelors in Artificial Intelligence And Machine Learning (AIML)

Narayana Junior College

2020 - 2022

Intermediate – MPC

Percentage: 91.8%

TECHNICAL SKILLS

Languages: python

Libraries: Pandas, Numpy, Matplotlib, seaborn, Scikit-learn

Frameworks: Flask, FastAPI, Streamlit

Tools: Excel, Power BI, Git

Databases: MySQL

ACADEMIC PROJECTS

California Housing Price Prediction (Machine Learning)

- Developed a predictive regression model using Python and Scikit-learn to estimate California housing prices based on real-world datasets.
- Performed data pre-processing, feature engineering, and model evaluation using Linear Regression algorithm.
- Visualized insights using Matplotlib and Seaborn, improving interpretability of housing market trends.
- Achieved high accuracy and deployed the model using FastAPI for real-time predictions.

Academia Bot

- Designed and developed chatbot using Flask framework to assist students with academic and administrative queries at Acharya Nagarjuna University.
- Created an interactive web interface for real-time communication between students and the chatbot.
- Integrated predefined intents and dynamic responses, improving query handling efficiency and user satisfaction.

CERTIFICATIONS

- Data Analyst
- Prompt Engineering

SOFT SKILLS

Team Collaboration | Communication | Adaptability | Leadership | Time Management
